Corporate and Enterprise Trends

Environmental responsibility

Corporations are urged to prioritize sustainability amid environmental concerns.

Digital transformation

Technology and digitalization are key drivers for business success.

The rise of Technology Transfer

Employees expect a smooth and faster communication to increase business.

Enabling inclusion

Organizations are breaking down barriers to improved collaboration and connection for a more inclusive workplace.

Solutions for corporate organizations and enterprises

Create a best-in-class corporate environment that embraces the latest technology and business trends with our sustainable AV solutions.

Video Conferencing

Face-to-face interaction boosts connection and organization with partners, helping them stay in touch and perform their best.

Screen Sharing

Easily mirror content wirelessly from handheld device with in-built support for Apple AirPlay and Google Chromecast.

Pro Mode (Customizations)

Pro Settings mode lets you customize, disable input/remote, schedule on/off, and block buttons and apps for office use.

Easy Plug and Play

Input source is automatically detected and seamlessly switched whenever an HDMI cable is connected to the device, ensuring a smooth and hassle-free experience for the user without the need for any manual intervention.

PC input Optimization

Help support staff communicate more quickly and effectively with automatic aspect ratio adjustment. This ensures that content displays properly on any screen, reducing the need for manual corrections and allowing smoother communication.

Content Management System (CMS)

We offer seamlessly integrated global solutions that foster an optimal work environment, promoting better collaboration, increasing productivity, and supporting operations across various teams and locations for sustained business success.

Remote Management System (RMS)

Leading automation using RS-232 is seamlessly supported with global vendor integration, ensuring efficient device communication, simplifying system management, & promoting reliable, streamlined operations across various platforms for improved performance and connectivity.

Open Platform

Install any Android package file directly from the Play Store, ensuring optimized performance and ease of operation. This seamless process enhances user experience, simplifies system management, and improves overall functionality across various applications & devices.

Multi-Display Setup (MDS)

The app enables you to create stunning video walls by effortlessly 'tiling' multiple Pro-BRAVIA displays together, delivering an impressive, unified visual experience that enhances presentations and elevates display quality in diverse environments and applications.

Visitor experience

Create a stunning visual impact in entrance lobbies, boardrooms, and conference spaces with our BZ53L & BZ40L Series. It offers an impressive 98-55 inch screen sizes. Unique feature in industry Deep Black Non-Glare Coating (Haze 47-58%*), which reduces reflections and enhances contrast for vivid images and ensures your corporate message is always clear, even in brightly lit lobbies, meeting rooms and open areas.

Information Sharing

Keep staff and guests informed about events and company announcements with BZL Series which supports leading automation and control platforms like CMS, RMS & HTML5 Platform.

Wayfinding

Installation flexibility which enables to present wayfinding information to visitors by blending images, videos, text, and web content. Supports portrait and tilt modes.

Board Room Design

Ideal for remote, hybrid and collaborative working, versatile EZ20L, BZ30L, BZ35L, BZ40L and BZ53L sized 43" to 98" can suit virtually any room type and size.

*85 inch

Meeting Room Design

Offer coworking tenants a seamless, easy-to-use collaborative working experience with our connected AV solutions.

BRAVIA Pro BZ-L Series with Deep Black Non-Glare Coating

Exceptionally bright 4K displays with unique Deep Black Non-Glare Coating having clarity and contrast, even in bright lighting
Available in screen sizes 55", 65", 75", 85"* and 98".

BRAVIA BZ40L and BZ53L Professional Displays are packed with Sony innovations – including the latest Deep Black Non-Glare Coating (Haze 47- 58%) – for impressively bright, high-contrast 4K HDR images with sumptuous colors and exquisite detail that can be achieved in even the brightest/high ambient light work environments.

Bright or harsh room lights can mean grey, washed-out images in, corporate lobbies, conference rooms. Sony's Deep Black Non-Glare Coating combines anti-glare and low-reflection technologies. Reducing reflections and boosting contrast, it's the key to dynamic visuals bursting with true-to-life colour and detail that inspire everyone, from corporate visitors and staff.

The Challenge

- The executive conference rooms faced significant ambient light from large windows, diminishing the quality and visibility of on-screen content
- Standard displays struggled to maintain clarity and vibrancy under such bright conditions
- The viewing experience failed to meet the high standards expected by senior executives

The Solution

- Deep Black Non-Glare coating, boasting anti-glare and low-reflection technologies, provides an exceptional ambient light rejection

The Outcome

- The implementation of the Professional BRAVIA BZ40L & BZ53L Displays significantly enhanced the user experience
- By effectively mitigating ambient light issues, these displays ensure visual clarity and impact, meeting the demanding requirements of a high-caliber corporate environment

Data Projectors

BrightEra
Long Lasting Optics

Z-Phosphor
LASER LIGHT SOURCE

21:9 support open doors to new applications

Our easy-to-use AV solutions help organizations provide a flexible environment that employees expect in today's commercial world. Collaborate with distant colleagues using 21:9 images in conference rooms with bright laser projectors.

21:9 projection displays offer a new dimension of immersion and engagement across various applications, making them essential for those who seek to captivate, educate, and entertain. In addition to 16:10 and 16:9 aspect ratios, the VPL-PHZ61/51 will now also support 21:9 aspect ratio with 2560x1080 signal input allowing you to innovatively project ultra-wide hybrid meetings on larger screens that optimize visual presence of remote participants.

Features

Clearer images and text

Reality Creation uses powerful algorithms that boost image resolution closer to 4K-like quality. Reality Text improves visibility of characters: great for university conference rooms.

Bright, beautiful colours

Bright View is Sony's unique processing technology that brightens images while maintaining rich colour – even in brightly-lit business and educational environments.

Enhanced viewing experience

Intelligent Settings with Ambiance uses a built-in light sensor to measure room brightness, automatically adjusting Bright View mode, colour gain and Reality Creation to suit your presentation environment.

Designed with intelligence

Intelligent Settings simplifies installation and maximises performance based on usage, image detail, colour richness and fidelity, light output, cooling level and output noise. The Meeting/Classroom function controls laser output to keep brightness as high as possible for years of real-world use.

Keep dust out of the picture

The projector's laser light source is sealed to prevent dust accumulation and eliminate reduced brightness. The dedicated cooling duct structure for the projector's 3LCD panels is covered with an air filter to prevent dust from entering.

Hassle-free filter care

The new dust filtration system makes changing filters a thing of the past for general use in classrooms and meeting rooms.* For heavier use in dusty environments there's a new clogging sensor to advise when filter cleaning is needed. *Dust density < 0.03mg/m³ and operating time < 10,500 hours. (1,500 hours/year over 7 years.)

Data Cloning

Settings for one projector can be copied to other projectors using a USB memory drive. This greatly simplifies installation and set-up of multiple projectors.

Auto Input Select

The Auto Input Select feature automatically selects an active signal input, so there's no need to change input each time a device is connected to the projector.

Auto Power On

Connect the VPL-PHZ61/51* to a switched-on computer, and the projector turns on automatically without having to operate the power button.

Remote Working

Trends

Digital transformation

Technology and digitalization are key drivers for business success.

Workforce fluidity

Offering flexibility in working conditions and location is key to attracting and retaining talent.

Environmental responsibility

Demonstrating sustainability and a reduced environmental footprint is critical for every business.

Redefining the workplace

The post-pandemic shift to home and remote working continues to affect office usage patterns.

Corporate solutions for remote working

Our AV solutions for remote and hybrid working create a truly connected environment, allowing people to collaborate more effectively from any location – in office huddle spaces and meeting rooms, at home or on the move.

Brand elevation

Give employees and investors confidence in organizations' image as a favored destination to attract and retain talent.

Increasing productivity

Facilitate high quality remote meetings that drive improved collaboration and productivity, enabling employees to deliver their best.

Supporting sustainability

Reduce the environmental footprint of business operations and reduce the need for travel to physical meetings.

PTZ and Remote Cameras

Remotely capture broadcast quality images with smooth, silent PTZ and excellent low-light sensitivity. This line up is ideal for a variety of applications, including broadcasting, events and house of worship.

Ceiling Microphone MAS-A100

Introducing Sony's beamforming ceiling microphone with advanced speech reinforcement technology – enabling truly hands-free and contactless lectures and presentations.

Features

Bass Boost

**Dante® and PoE
compatibility**

Status LED

API

Contactless, hands-free ceiling beamforming microphone with speech reinforcement capability

The MAS-A100 is a state-of-the-art speech reinforcement* and recording solution. Attaching and positioning lavalier microphones is time-consuming, and handheld microphones restrict movement. However, the Beamforming Microphone is simply affixed to the ceiling, then ready to use – leaving the orator location-free, hassle-free and hands-free to focus on presenting. And what's more, operation is totally contactless, reducing risk of infection for users.

*Loud speaker system is required for speech reinforcement

Sustainability in every scene

With BRAVIA, you will be able to enjoy the most immersive display experiences with stunning designs, right alongside innovations to lower environmental impact by helping reduce energy consumption and use of non-renewable resources.

Advanced engineering for sustainability

To reduce environmental impact, we are working on multiple aspects across the product life cycle, such as:

**Reduction of
virgin plastic**

**Improvement of
transportation efficiency**

**Review of power
consumption during use**

Towards closed loop with repeated recyclability

One advantage of SORPLAS™ is that it won't degrade too much even after being recycled several times. Recycled SORPLAS™ parts have a potential to reduce the volume of waste and contribute toward recycle-oriented society.

Smaller and lighter packaging with less plastic

By reengineering the packaging that protects the product during shipping, we cut the package size by 15% and total weight by 10%. This increases the number of units on one pallet by approximately 1.3 times. As a result, CO2 emissions per unit from product transportation have been reduced by approximately 15%*.

Using less virgin plastic: Combining high recycling and product quality

Across every design aspect, from material development to aesthetics, we succeeded in increasing our use of recycled material while preserving the high-quality finish. Especially, for OLED TVs and Professional BRAVIA displays, Sony-developed SORPLAS™ recycled plastics are used for the rear cover, the largest TV part by area, reducing overall virgin plastic use by approximately 60%.

Alliance and Technology Partners

We work closely with top companies to add even more value to our industry-leading AV products and solutions.

Whether it's configuring a digital signage network, connecting participants using video collaboration, or outfitting a room for device management and automation – Sony is committed to helping you. Our goal is to make your life easier, enabling you to optimize AV solutions from one proven and trusted source.

Discover who we're working with to create exciting new connected audio-visual experiences with simplified integration and lower operating costs.

X|R

Advanced AI Processor with Cognitive Intelligence

Bringing you an experience that's closer to the real world and puts you deeper into every scene.

The Advanced AI XR Processor with cognitive intelligence enhances picture and sound quality by analyzing and upscaling content in real-time, delivering a highly immersive viewing experience.

X|R Picture

Focusing the same way our eyes do

BRAVIA XR TVs detect the main focal point in the scene and enhance each detail in the object, ensuring that it stands out with a natural sense of depth, the same way as in the real world.

X|R Sound

Sound positioned to bring you into the action

BRAVIA XR TVs use advanced sound processing to make sound match precisely with what's on the screen, resulting in a feeling like you're right there in the heart of the scene.

CES® 2022 Innovation Awards,
award to BRAVIA CORE

Bring the cinematic experience home, enjoy movies included with BRAVIA XR™

A huge number of movies are waiting for you. With BRAVIA XR technology, Pure Stream™ and IMAX® Enhanced, everything you watch is delivered with stunning visuals and expressive sound quality. With SONY PICTURES CORE Calibrated mode, your movie will automatically adjust to the optimal picture settings to create a truly exceptional at-home movie viewing experience.

Get up to
15 + 24
movies months
